Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ujita (US 6,820,973 B2) in view of Kanbayashi et al. (US 5,847,736).

Ujita discloses the following claimed limitations:

- * regarding claim 1, an ink jet recording apparatus (Abstract),
- * a carriage/4 of fig 2/ equipped with a recording head/11, 26/ for discharging ink and a first ink tank/6/ for housing ink to be supplied to the recording head/26/ (figs 1-5);
- * a second ink tank/7/ which is arranged separately from the first ink tank/6/ and is connected with the first ink tank in order to supply the ink to the first ink tank,
- * wherein an ink absorber/24/ having a lot of cavities/holes or spaces in the absorber/(see fig 5) for holding the ink is arranged in the first ink tank;

Ujita does not disclose the following:

- * an average distance between cavities is 0.12 mm to 0.25 mm.

Kanbayashi et al. disclose the following claimed limitations:

- * an average distance between cavities/absorption sheets/ is 0.12 mm to 0.25mm/0.1mm to 0.5 mm/.

Art Unit: 2861

It would have been obvious at the time of the invention was made to a person having ordinary skill in the art to utilize an average distance between cavities is 0.1 mm to 0.5 mm as taught by Kanbaashi et al. into Ujita for the purpose of absorbing wasted ink.
